## SERVICE NOTES FOR APRIL.

These notes contain instructions and necessary information to forest officers, and will therefore be carefully read and kept on file for reference.

### LAW.

#### OFFICE OF THE SOLICITOR.

##### Law Case in District 1—

T. D. Farrow, innocent timber trespass, Flathead National Forest, damage \$42.50, settled March 10, 1914.

##### Law Cases in District 3—

On January 18 Jesus and Francisco Anacoma were arrested for stealing Government property from the Metcalf Ranger Station, Apache National Forest. At the hearing before the United States commissioner on January 23 the case was dismissed because of the youthfulness of the defendants, and they were turned over to the State authorities, who had them committed to the State reform school until they are 21 years of age.

On January 2 the grazing trespass case against A. G. Seis, Manzano National Forest, was settled by payment of \$226, the full amount demanded.

On February 16 the timber trespass against the Tularosa Copper Co., Alamo National Forest, was settled by payment of \$68.75, the full amount demanded.

The grazing trespass case against J. A. Gallegos, Carson National Forest, was compromised, and the sum of \$50 was accepted in settlement.

On March 2, 1914, Thomas R. King pleaded guilty to an indictment charging him with the unlawful grazing of sheep on the Prescott National Forest. He was sentenced to pay a fine of \$25.

##### Law Cases in District 4—

An indictment was returned by the Federal grand jury at Boise, Idaho, on February 6, charging Jacob Bear, a sheep herder, with starting a fire in the Boise National Forest and leaving it without having extinguished it. The case was set for trial on or about March 27.

In the case of *United States v. Utah Power & Light Co.* a motion for rehearing before the United States Circuit Court of Appeals was denied, which will result in the case being returned to the district court for further proceedings in accordance with the decision.

The Attorney General has filed a petition of intervention in a case brought by the Boise Lumber Co. against the Oregon Short Line and the Pacific & Idaho Northern Railroad Co., asking the Interstate Commerce Commission to reduce freight rates on logs from points in the Payette and Weiser National Forests into Boise, Idaho. A petition of intervention has also been filed by the State of Idaho on behalf of the public utilities commission of that State and also on behalf of the State board of land commissioners, the State being the owner of a considerable body of standing timber which would be affected by the rates. The hearing is set for about June 15, 1914, at Boise, Idaho.

#### **Law Cases in District 5—**

A timber trespass of the Verdi Lumber Co., on the Tahoe National Forest, was settled by the payment of \$318.60.

A timber trespass of the Swayne Lumber Co., on the Plumas National Forest, was settled by payment of \$303.88.

Payment in full in the sum of \$111.48 was made in settlement of a timber trespass of J. J. Potter on the Modoc National Forest.

R. M. Diggs settled two grazing trespass cases by the payment of the respective sums of \$68.75 damages and \$9.50 costs and \$47.12 damages and \$23.35 costs. A decree of perpetual injunction was also entered in both cases by consent of the defendant.

Do Ohtart and L. Lopeteguy settled their grazing trespass, on the Kern National Forest, by the payment of actual damages in the sum of \$12.34. These parties previously plead guilty to a criminal charge in the same trespass and were fined.

Settlement for grazing trespass on the Mono National Forest, in amount \$86.40, was made by F. W. Simpson.

Settlement for grazing trespass on the Mono National Forest, in amount \$82.80, was made by C. E. Wedertz.

#### **Law Case in District 6—**

On February 4, 1914, the Circuit Court of Appeals for the Ninth District reversed the decision of Judge Wolverton in the case of the United States *v.* E. J. Cowlshaw et al., and held that in this case the State of Oregon took title to the school section involved, which was embraced in national forest withdrawal subsequent to the survey in the field and approval thereof by the surveyor general for Oregon, but prior to the acceptance of the survey by the Commissioner of the General Land Office, Judge Gilbert dissenting. The decision was not based upon the nature of the grant, but it held that a sufficient survey had been made at the time of the withdrawal to except it therefrom and vest title in the State. Appeal is now being prepared to the Supreme Court of the United States.

## OPERATION.

**Perpetuation of Dilapidated Land Office Corners—**

Reference is made to an erroneous statement concerning the restoration of lost or obliterated corners appearing on page 93 of the Field Program of January, 1913.

*Restoration by Authorized Officials Only.*—No Land Office corner can be legally restored (in a manner which will be recognized by the General Land Office) by any person who is not formally instructed to do the work by the United States surveyor general for that State.

*Tampering with Corners a Penal Offense.*—To aid in the protection of all evidence of public-land surveys, a clause was enacted in chapter 398, 29 United States Statutes, page 343, prohibiting the destruction or removal of monuments of any United States survey, and fixing penalties for violation.

This clause was amended by section 57 of the act approved March 4, 1909, revising and amending the penal laws of the United States, to read as follows:

SEC. 57. Whoever shall willfully destroy, deface, change, or remove to another place any section corner, quarter-section corner, or meander post, on any Government line of survey, or shall willfully deface, change, or remove any monument or bench mark of any Government survey, shall be fined not more than two hundred and fifty dollars, or imprisoned not more than six months, or both.

*Actions to be Avoided by Forest Officers.*—Forest officers are instructed not to attempt to "restore" Land Office corners, or to remark their locations by using a combination of materials and markings which may be mistaken for the work of the Land Office, except when they work under formal instructions from a surveyor general.

They should not build up dilapidated corners with stones bearing notches or grooves, or the numerals  $1/4$ , or dig pits, or scribe blazed trees or posts at or near the location of a Land Office corner. The practice of setting stones marked with notches, grooves, or  $1/4$ , and the additional letters F S is specifically prohibited.

In retracing Land Office lines care should be taken not to disturb the condition in which corners are found, since such action may destroy all evidence by which the corner can be absolutely identified. Let the marked stone or stake lie just where it is found. Do not use the stones at the corner to build a new mound, as the marked stone described in the official record may unwittingly be removed from its proper location or other evidence of the true point for corner destroyed. If needed to pile around a stake or marked stone, bring stones from another locality.

*How to Perpetuate Dilapidated Corners.*—It is highly desirable, however, that the exact location of Land Office corners found in a dilapidated condition should be perpetuated. For this purpose the metal Forest Service cruising poster should be employed. It should be nailed to a post, either driven in the ground or set in a pile of stones. The location should be as near to the true point for corner as may be

determined. The poster may also be nailed on witness trees, but unless the tree itself is the point for corner the poster should have the word "Witness" scratched upon it in addition to the proper marking to show the location of the corner in the survey system.

*Stone Monuments May be Used on Forest Boundaries Only.*—It is not intended to prevent entirely the use of stone, which is the most durable and convenient material for marking forest boundaries.

At any mile or half mile on a boundary a single large stone monument may be erected, care being taken not to damage or cover up existing Land Office corners. At mile points the section numbers should be cut, *in Arabic figures only*, on the four sides of the main stone, facing the corresponding sections. At half-mile points the *Arabic* numbers of the two opposite sections should be cut on the sides of the stone facing them, and in addition the words "Half Mile." On both kinds of monuments the letters F S should always be cut on top. The marked stone should be in the mound, and not set with a separate mound of stone or earth, as is the Land Office practice.

No witness trees should be scribed, the cruising poster being nailed on the blazes instead, when it is desired to construct and record witnesses for the boundary monuments in unsurveyed lands or draw attention to bearing trees of the Land Office on which the scribing is illegible or grown over or erased. Care must be taken in blazing not to destroy Land Office scribing which may have become grown over with bark.

*Previous Instructions for Surveys not Modified.*—Nothing in this statement should be understood as modifying any previous instructions for Settlement or Entry Surveys.

## LANDS.

### Settlement—

March 14, 1914, the Assistant Secretary of the Interior, in the case of Robert G. McDougall, on appeal, final proof submitted on a June 11 entry in the Jemez National Forest, held that credit may be accorded for residence for the full period after the date of the special-use permit and revoked former decisions and instructions to the contrary. The decision says:

Technically this land was not public land, and was not subject to general settlement claim at the time this entryman made settlement thereon, but he was not a trespasser, as he had filed his application for listing with the Forest Service for opening under the said act of June 11, 1906, and had been given a special-use permit by that service. He was, therefore, in legal occupation of the land after the date of the permit, with the understanding that if the tract be found appropriate for opening under said act, he would have a preference right of entry, as provided by that act. He thus had a restricted or qualified settlement claim. If it had resulted that his application for listing could not be allowed, then, of course, his settlement could not have ripened into a claim for title. But the land was opened upon his application, he was accorded preference right of entry, and he made entry, all in pur-

suance of the claim initiated by his application. No good reason is seen why credit for residence for the full period after the date of the permit may not be accorded under such circumstances.

### ACCOUNTS.

#### **Bill of Lading—Appropriation to be Indicated—**

In the field program for April, 1912, and subsequently by circular letter of the Forester, all forest officers making shipment on bills of lading were requested to see that the appropriation chargeable was properly indicated on the original bill of lading, Form L, delivered to the transportation company, as well as on the Form M sent to the district fiscal agent.

These instructions have been overlooked in many cases, and forest officers are again requested to give the matter attention, as it is of importance in the settlement of transportation accounts in the Washington office.
